MY PROFESSIONAL IDENTITY

MARY CLAIRE L. FERNANDEZ

DEGREE / PROGRAM

- Bachelor of Science in Information Technology (BSIT), 4th Year
- Southern Philippines Agri-Business, Marine and Aquatic School of Technology

TARGET POSITION

- Junior Web and Database Developer

CONTACT

- mc.fernandez@gmail.com
- 09569135784
- Poblacion, Santa Maria, Davao Occidental

THREE PROFESSIONAL STRENGTHS

- *Adaptability*
- *Critical thinking*
- *Leadership (class officer, 1st to 3rd year)*

THREE SKILLS I CAN OFFER AN EMPLOYER

- *Web development*
- *Database design and management*
- *Data analytics and reporting*

PROFESSIONAL STATEMENT

I am a BSIT student who builds practical web and database solutions, as shown in my individual Library Management System with Analytics. I adapt quickly to new tools, think through problems carefully, and communicate clearly with my teammates. I am looking for an entry-level IT role where I can contribute reliable work and keep growing.

TENSES AT WORK

Twelve original workplace sentences, each showing a different tense in a different professional situation

Workplace Situation	Sentence	Tense Used	Why the Tense Is Appropriate
Describing a regular procedure	The system administrator backs up the database every night at 11:00 PM.	**Simple Present**	It states a routine or standing procedure that happens regularly.
Giving a progress update	Our developers are testing the new login module this week.	**Present Continuous**	It describes work that is in progress at the present time.
Reporting a task with a current result	I have updated the user manual with the latest changes.	**Present Perfect**	It reports a finished action whose result matters now.
Explaining ongoing effort	The support team has been resolving network tickets since 8:00 AM.	**Present Perfect Continuous**	It shows an activity that began earlier and is still continuing.
Reporting a completed incident fix	The IT department restored the server on Monday morning.	**Simple Past**	It reports a completed action at a specific time in the past.
Explaining an interruption	I was reviewing the database logs when the error message appeared.	**Past Continuous**	It shows an action in progress that was interrupted by another event.
Clarifying the order of events	We had already fixed the bug before the client reported it.	**Past Perfect**	It shows which of two past events happened first.
Explaining effort before a launch	We had been testing the application for two weeks before we released the update.	**Past Perfect Continuous**	It highlights how long an activity went on before a past event.
Making a commitment	I will send the revised project proposal to Ms. Duida by Friday.	**Simple Future**	It expresses a promise or decision about a future action.
Announcing a scheduled presentation	Our team will be presenting the analytics dashboard at 2:00 PM tomorrow.	**Future Continuous**	It describes an action that will be in progress at a specific future time.
Stating completion by a deadline	By the end of the month, we will have migrated all records to the new platform.	**Future Perfect**	It shows an action that will be completed before a future deadline.
Projecting a milestone	By December, the development team will have been maintaining the system for one full year.	**Future Perfect Continuous**	It emphasizes how long an activity will have continued by a future point.

SAY IT TWO WAYS

Four workplace situations written in both active and passive voice, with the better choice explained.

Situation 1: Reporting who completed a task	
ACTIVE	The network team restored the server after the outage.
PASSIVE	The server was restored by the network team after the outage.
MORE APPROPRIATE: ACTIVE	It names who did the work, so credit and responsibility are clear. It is also shorter and more direct.

Situation 2: Reporting an incident when the person responsible is unknown	
ACTIVE	Someone deleted the old customer files last night.
PASSIVE	The old customer files were deleted last night.
MORE APPROPRIATE: PASSIVE	The doer is unknown, and the focus is on what happened to the files. The passive also avoids sounding like blame.

Situation 3: Announcing scheduled system maintenance	
ACTIVE	The IT department will shut down the system for maintenance on Saturday.
PASSIVE	The system will be shut down for maintenance on Saturday.
MORE APPROPRIATE: PASSIVE	Employees need to know what will happen to the system and when. Who performs the maintenance is not important to them.

Situation 4: Giving a workplace instruction	
ACTIVE	Employees must submit their timesheets to the HR office by Friday.
PASSIVE	Timesheets must be submitted to the HR office by Friday.
MORE APPROPRIATE: ACTIVE	It tells readers directly what they must do, which makes instructions clearer and leaves no doubt about who is responsible.

*Key idea: **Active voice** is best when the doer of the action matters. **Passive voice** is best when the action or the receiver matters more than the doer.*

MAKE IT PROFESSIONAL

Five overly informal workplace statements revised into professional language.

1. Too Informal	“Hey sir, I can’t come tom coz I’m sick.”
Professional Version	“Good morning, Sir. I regret to inform you that I will be unable to report to work tomorrow due to illness. I will submit a medical certificate upon my return.”
What Changed	Added a proper greeting and formal phrases (“regret to inform,” “unable to report”). Replaced text-speak (“tom,” “coz”) with complete words and stated a follow-up action.

2. Too Informal	“Your system is so buggy, it keeps crashing lol.”
Professional Version	“Good afternoon. I would like to report that the system has been crashing repeatedly. Could you please look into this issue at your earliest convenience?”
What Changed	Removed the casual and insulting words (“so buggy,” “lol”), described the problem objectively, and turned the complaint into a polite request.

3. Too Informal	“Idk what u want me to do with this task.”
Professional Version	“Good morning. I would appreciate clarification about the requirements of this task. Could you please specify the expected output and the deadline?”
What Changed	Replaced slang (“Idk,” “u”) with complete sentences. The revision shows willingness to work and asks specific questions instead of expressing confusion.

4. Too Informal	“Gonna be late to the meeting, sorry!!”
Professional Version	“Good morning. I would like to inform you that I will arrive about fifteen minutes late to the meeting. I apologize for the inconvenience.”
What Changed	Replaced “gonna” with a formal verb form, gave a specific time, removed the extra punctuation, and used a measured, professional apology.

5. Too Informal	“Fix this now, it’s urgent!!!”
Professional Version	“Good afternoon. Could you please prioritize resolving this issue? It is affecting our client’s transactions today. Thank you for your prompt assistance.”
What Changed	Changed the command into a polite request (“Could you please”), explained the reason for the urgency, removed the exclamation marks, and ended with thanks.

YOU'VE GOT MAIL

A professional email following up on a job application

From: Mary Claire L. Fernandez <mc.fernandez@gmail.com>
To: Ms. Khayrizzia Padoran Duida, Human Resources Manager <recruitment@techbridge-solutions.ph>
Subject: Follow-Up on Application for Junior Web and Database Developer

Dear Ms. Duida,

Good day. I hope this message finds you well.

I am writing to follow up on my application for the Junior Web and Database Developer position at Mindanao TechBridge Solutions, Inc., which I submitted on September 28, 2026.

My application included my résumé and cover letter. I am a fourth-year BSIT student at the Southern Philippines Agri-Business, Marine and Aquatic School of Technology (SPAMAST), and I developed a Library Management System with Analytics as my individual thesis project. I remain very interested in contributing my web development and database skills to your team.

I would appreciate it if you could let me know the current status of my application or inform me if any additional documents are required. I am also available for an interview at any time that fits your schedule.

Thank you for your time and consideration. I look forward to hearing from you.

Respectfully yours,

Mary Claire L. Fernandez

OFFICE MEMO

A memo announcing a project deadline.

MEMORANDUM

TO: All Members, Web Development Team

FROM: Mary Claire L. Fernandez, Junior Web and Database Developer

DATE: August 9, 2027

SUBJECT: **Deadline for Submission of Customer Portal Testing Reports**

This memo reminds all team members that the testing reports for the Customer Portal project are due on Friday, August 20, 2027, at 5:00 PM.

Each report should include the following:

1. The test cases performed and their results
2. A list of the bugs found and their current status
3. Screenshots that support each reported bug

Please save your report as a PDF file named *Surname_PortalTestingReport* and upload it to the shared project folder before the deadline. If you expect a delay, kindly inform me by **Wednesday, August 18, 2027** so that the schedule can be adjusted.

Thank you for your cooperation. For questions, you may message me through the team chat or by email.

WRITE FOR A PURPOSE

A request letter written in a realistic workplace situation.

Mindanao TechBridge Solutions, Inc.
Web Development Department
Davao City, Philippines

September 6, 2027

Mr. Eduardo Villanueva
IT Manager
Santa Maria Community Cooperative
Poblacion, Santa Maria, Davao Occidental

Subject: Request for Test Server Access and Sample Data

Dear Mr. Villanueva:

Good day. I am writing on behalf of our project team to respectfully request access to your cooperative's test server and a sample of your member records. We need them to complete the integration of the new online membership system that our company is developing for your organization.

Specifically, we ask for (1) a test account with read and write permissions to the test server, and (2) an anonymized sample of at least 100 member records in spreadsheet format. These will allow us to check that the data fields transfer correctly before the system goes live. We will use the data only for testing purposes and will delete it once testing is finished.

To keep our schedule on track, we would be grateful to receive the access details and sample data by Friday, September 17, 2027. If you need any further information or approvals from us, please feel free to contact me at mc.fernandez@gmail.com or 09569135784.

Thank you very much for your time and continued support of this project.

Respectfully yours,

Mary Claire L. Fernandez
Junior Web and Database Developer
Mindanao TechBridge Solutions, Inc.

10 RULES BEFORE YOU HIT SEND

A quick guide to professional email communication

1	**Write a Clear Subject Line** A short, specific subject tells the reader the purpose before opening the message. “Request for Meeting on Friday” works better than “Hello.”	2	**Use a Proper Greeting** Address the reader by title and surname, such as “Dear ,” unless told otherwise. Avoid casual openers like “Hey.”
3	**Keep Your Tone Polite** Writing has no tone of voice, so words like “please” and “thank you” prevent your message from sounding rude or demanding.	4	**Be Clear and Concise** State your purpose in the first lines and use short paragraphs. Busy readers should understand what you need quickly.
5	**Check Grammar and Spelling** Errors weaken your credibility. Avoid text-speak such as “u” or “asap” and use complete sentences.	6	**Mention and Attach Files** Name each attachment in the message, give files clear names, and confirm that they are attached before you send.
7	**Use CC and BCC Wisely** CC only people who need to know. Use BCC to protect the privacy of a large group, and reply to all only when necessary.	8	**Respond Promptly** Reply within one working day, or send a short note that you received the message and when you will answer fully.
9	**Proofread Before Sending** Re-read the message once, checking names, dates, numbers, and recipients. A quick check can prevent embarrassing mistakes.	10	**End with a Professional Signature** Close politely and include your full name, position, and contact details so the reader knows who you are and how to reach you.

MARY CLAIRE L. FERNANDEZ

Aspiring Junior Web and Database Developer

mc.fernandez@gmail.com | 09569135784 | Poblacion, Santa Maria, Davao Occidental

TECHNICAL SKILLS

- Web development
- Database design and management
- Data analytics from history records
- Java programming (SoloLearn certified)
- Microsoft Office

SOFT SKILLS

- Adaptability
- Critical thinking
- Leadership
- Technical documentation

TRAINING AND SEMINARS

- Microsoft Office Training
- SoloLearn Java Course Certificate
- Intellectual Property Orientation / Seminar

ACHIEVEMENTS

- Graduated from high school with honors (2023)

ON-THE-JOB TRAINING

- Not yet completed. Available for OJT or entry-level placement.

PROFESSIONAL SUMMARY

Fourth-year BSIT student with hands-on experience in web development, database design, and basic data analytics gained through an individual thesis project. Adaptable and detail-oriented, with leadership experience as a class officer. Seeking an entry-level web or database position where I can contribute and grow.

EDUCATION

Bachelor of Science in Information Technology

Southern Philippines Agri-Business, Marine and Aquatic School of Technology (SPAMAST)
2023 – Present | 4th Year

Information and Communications Technology (High School)

Heracles Casco Memorial National High School
Graduated 2023, With Honors

Elementary

Jose Timbol Sr. Central Elementary School

PROJECTS

Library Management System with Analytics (Individual Thesis Project, SPAMAST)

- Developed the system independently, from planning to documentation
- Designed the database for library, borrower, and transaction records
- Built analytics from borrowing history records to show usage patterns
- Wrote the complete thesis documentation

LEADERSHIP EXPERIENCE

BSIT Class Officer, SPAMAST

- Class Mayor / Class Representative – 1st Year
- Vice Mayor – 2nd Year
- Treasurer – 3rd Year

SHOW YOUR VALUE

Five résumé-ready achievement statements that begin with strong action verbs.

1

Developed a Library Management System with Analytics as an individual thesis project, completing the system design, database, and documentation from start to finish.
ACTION: Developed **TASK:** a Library Management System with Analytics **RESULT:** a complete system and thesis manuscript produced independently

2

Designed a structured database for book, borrower, and transaction records, giving the system organized and easily retrievable library data.
ACTION: Designed **TASK:** a structured database for library records
RESULT: organized, retrievable data for the whole system

3

Analyzed borrowing history records to produce usage insights that help librarians monitor book circulation and borrower activity.
ACTION: Analyzed **TASK:** borrowing history records **RESULT:** usage insights that support library monitoring

4

Represented classmates as class representative and vice mayor over two school years, relaying their concerns and helping coordinate class activities.
ACTION: Represented **TASK:** classmates in a class officer role **RESULT:** a stronger link between students and faculty

5

Managed class funds as Class Treasurer, recording collections and expenses to keep financial records accurate and transparent.
ACTION: Managed **TASK:** class funds and records **RESULT:** accurate and transparent financial records

Formula used: ACTION (strong verb) + TASK (what I did) + RESULT or CONTRIBUTION (why it mattered). The action verb in each statement is highlighted in green bold.

WHY SHOULD WE CONSIDER YOU?

A one-page cover letter for the Junior Web and Database Developer position.

September 28, 2026

Ms. Khayrizzia Padoran Duida
Human Resources Manager
Mindanao TechBridge Solutions, Inc.
Davao City, Philippines

Application for Junior Web and Database Developer

Dear Ms. Duida:

I am writing to apply for the position of Junior Web and Database Developer at Mindanao TechBridge Solutions, Inc. I am a fourth-year Bachelor of Science in Information Technology student at the Southern Philippines Agri-Business, Marine and Aquatic School of Technology (SPAMAST), and I would like to contribute my web development and database skills to your team.

For my individual thesis project, the Library Management System with Analytics, I designed the database, built analytics from borrowing history records, and wrote the complete documentation. This project taught me how to plan, build, and document a system on my own. I have also completed a SoloLearn Java course and Microsoft Office training, and I attended an Intellectual Property orientation.

My strengths are adaptability, critical thinking, and leadership. I served as class representative, vice mayor, and treasurer during my first three years in college, which taught me to communicate with faculty and classmates and to take responsibility for my tasks. I learn new tools quickly and approach problems carefully.

I believe I can contribute to your company by developing reliable web features, maintaining well-organized databases, and preparing clear documentation. I am also eager to learn from your experienced developers and to grow with your team.

I have attached my résumé for your review. I would welcome the opportunity to discuss my application further at your convenience. Thank you for your time and consideration.

Respectfully yours,

Mary Claire L. Fernandez

WHAT WOULD YOU SAY?

Challenging situation: receiving unclear instructions from a supervisor.

1. THE SITUATION

Before leaving for a client meeting, my supervisor sent me a short message: “Please fix the report page before the client sees it.” The message did not say which report page, what was wrong with it, or when the work should be finished. The client is scheduled to visit tomorrow morning.

2. WHAT NOT TO SAY

“Fix what? You didn’t say what’s wrong with it. I’m not sure what you want, so I’ll just change whatever I think looks bad.”

3. WHAT I SHOULD SAY

“Good afternoon, Sir. Thank you for your message. To make sure I fix the right thing, may I clarify a few details about the report page?

1. Which specific report page should I review?
2. What issue should I correct (for example, the layout, incorrect data, or slow loading)?
3. By what time should the fix be completed before the client’s visit tomorrow morning?

In the meantime, I will check the page for obvious errors and prepare a list of what I find, so we can confirm the priorities quickly. Thank you.”

4. WHY?

My response is polite and respectful even though the instructions were unclear. It names exactly what information is missing instead of blaming my supervisor. The specific questions allow my supervisor to answer quickly, even from a busy meeting. It also shows initiative by explaining what I will do while waiting, which protects the deadline. Asking before acting prevents mistakes, wasted time, and changes the client should never see.

READY FOR THE WORKPLACE

Final reflection

Before this course, I thought professional communication was...

simply being direct and clear. I believed that if people understood my message, I had communicated well. I did not realize that tone, word choice, and politeness are just as important in the workplace.

One communication habit I realized I need to improve is...

my formal speaking. I am comfortable writing and explaining my ideas directly, but I need to practice using formal language when I speak in meetings and interviews. I plan to rehearse professional phrases and present my ideas aloud more often.

The most useful skill I learned during the Midterm Period is...

adjusting my tone and structure to fit my reader and my purpose, especially when writing professional emails, memos, and letters.

I can apply this skill in my future workplace by...

writing respectful emails to supervisors and clients, reporting system issues clearly, asking for clarification when instructions are unclear, and preparing documentation that non-technical users can follow.

As a future professional, I want people to describe my communication as...

clear, respectful, and dependable, as someone who explains technical ideas simply and treats every message with courtesy.

MY NO. 1 RULE FOR PROFESSIONAL COMMUNICATION

"Be clear enough to be understood and courteous enough to be trusted."
